## INFORMATION SHEET

# CHLORMATIC

## CHLORINATED MACHINE DISHWASHING POWDER

### DESCRIPTION:

**CHLORMATIC** is suitable for all types of commercial and household dishwashers in both soft and hard water. This premium grade product is especially suitable for use in hard water areas, where scale and stain control is of utmost importance.

### RECOMMENDED USE:

**CHLORMATIC** is specifically designed for machine dishwashing and effective stain control in all machine cleaning operations involving dinnerware, glassware, silver and stainless steel cutlery.

It is preferable not to mix silver, stainless steel and aluminium in one wash operation, as soft metals could be attached by electrolytic action caused by dissimilar metals in solution.

Do not allow prolonged contact with aluminium and other soft metals if pitting and discolouration are to be avoided.

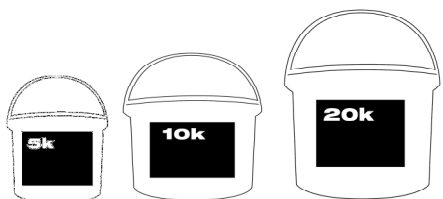

### RECOMMENDED USE:

Concentration is varied according to water conditions, temperature and type of machine, but normally 1-2 grams per Litre of water in the wash tank is sufficient at wash temperature 60-70°C.

Wash solution can be prepared, manually, by filling the dishwasher with fresh water and adding the required amount of **CHLORMATIC**. Mix the product into solution completely by running the machine.

### PACKAGING

5 kg, 10 kg, 20 kg

### BENEFITS & TIPS

- SUPER ECONOMIC 2 GRAMS PER LITRE OF WATER.
- HIGH PERFORMANCE
- SUITABLE FOR ALL WATER AREAS

### CONDITIONS OF SALE & USAGE (STANDARD DISCLAIMER)
