INFORMATION SHEET

SOLVENT DECARBONISER

DIPHASE SOLVENT CLEANER

DESCRIPTION:

AC635 is a yellow mobile liquid consisting of two phases with a top aqueous phase and a bottom solvent phase. The aqueous phase acts as a liquid seal to prevent loss of active volatiles contained in the solvent phase. **AC635** is formulated to remove carbon, resin, paint, varnish, oils and grease from ferrous metals and alloys. Aluminium, Zinc and other such amphoteric metals are not affected by **AC635** use.

RECOMMENDED USE:

AC635 is ideal for use to decarbonise carburettors, automotive engine parts, gears etc where they can be readily left immersed in a solvent bath.

If it is practicable to have a tall narrow bath it is advisable as this will limit the evaporation of the solvent

AC635 is tipped directly into a suitable metal container without any dilution to act as a bath. The size of the bath is dependent on the number and the size of the parts to be cleaned. Parts must be totally immersed in the **AC635** bath. The bath should not be **agitated and be positioned in a cool well ventilated area.**

It is recommended that the parts be pre-cleaned before introducing them into the bath. They should be left soaking until the soils become loosen. The parts are then removed and hosed down with water.

The **AC635** bath can be used repeatedly until it shows obvious signs of lack of stripping ability.

PRECAUTION: Ensure that bath has the aqueous layer intact at all times.

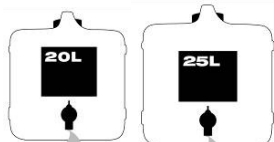

DIRECTIONS FOR USE:

Store **AC635** in a cool place away from heating devices.

Use protective clothing. Wear face masks or eye goggles and gloves. Open the **AC635** container cautiously in hot weather. Keep face away while unscrewing the cap.

PACKAGING:

Available in 20 litres and 25 litres

CONDITIONS OF SALE & USAGE (STANDARD DISCLAIMER)

This product should not be used for any purpose or in any manner contrary to the labelling, SDS, MSDS or Information Sheet unless authorised to do so under appropriate legislation. By purchasing and using this product the purchaser assumes responsibility for any and all results that may occur and shall not hold the manufacturer liable for any loss or injury however occurring.

BENEFITS & TIPS

- SURFACTANTS USED ARE CLASSIFIED BIODEGRADABLE
- READY TO USE.
- BATHS CAN BE REUSED
