## INFORMATION SHEET

# SUPER JET

## AUTOMATIC MACHINE DISHWASHING LIQUID

### DESCRIPTION:

**SUPER JET** is a non chlorinated automatic dishwashing machine detergent that contains a special blend of alkali and chelating agents that effectively remove food residues, tannin and scale deposits in all ware washing machines.

**SUPER JETS** concentrated free-rinsing formula is designed to give high levels economy. As little as 1-2 ml of **SUPER JET** per litre of water is sufficient for most ware washing machines. In situations where ultra concentrates detergent is required (normally because of space) "SUPERJET PLUS" is recommended. This product is available only by demand in 5ltr packs.

**SUPER JET** is formulated to work in both hard and soft water areas. Superjet contains ingredients that help to control scale build-up which means that your dishwashers is clean and free from build-up for longer delivering high levels of efficiency.

**SUPER JET** should be used in conjunction with a quality Rinse Aid. "DRY & SHINE" rinse aid is recommended for normal use. "SANI DRY" Sanitising Rinse Aid is recommended instead of "DRY & SHINE" for medium to high risk areas such as hospitals, prisons and aged care facilities.

### RECOMMENDED USE:

**SUPER JET** is caustic and is designed to only be used through a sealed dispensing systems supplied, installed and serviced by an authorised Able Westchem service technician.

### DISH WASHING GENERAL TIPS:

For best results, scrape food scraps from plates and stack crockery and cutlery in an upright position.

Always drop washing machine reservoir tank after every busy period. Never leave reservoirs to stand for over 6 hours (i.e. over night – health hazard).

Check Spray Jets and Arms and remove blockages. Blocked

### BENEFITS & TIPS

- CONCENTRATED MULTIPURPOSE FORMULA FOR ECONOMY & GREAT RESULTS
- INBUILT DESCALANT
- NO CHLORINE
- BIODEGRADABLE INGREDIENTS
- SANITISING RINSE AID AVAILABLE
- \* FREE-ON-LOAN

## INFORMATION SHEET

# SUPER JET

## AUTOMATIC MACHINE DISHWASHING LIQUID

Wash Jets (usually on bottom spray boom/s) result in poor general cleans, whilst blocked rinse jets (usually top spray system) result in hazy, spotted dishes that may appear to be film covered. Roughly 80% of all dirty dishes are a result of poor user maintenance with blocked jets the main culprit.

Periodically de-scale washing machine using a low foaming phosphoric acid cleaner such as "SACLEAWAY" or "PHOSCLEEN" to remove excess and hidden build-up. Particularly important in probed dispensing systems

Ensure that the washing temperature is maintained at approx 65°C and the rinse temperature is at or slightly above 82°C.

Never allow **SUPERJET** or DRY & SHINE to run out. Swap containers out before completely empty. Tip excess into new container.

Do not use **SUPER JET** on aluminium wares as pitting may occur over time. Use "POTWASH" instead of SUPER JET to safely clean Aluminium wares.

**WARNING: SUPER JET** is highly corrosive to skin and eyes. Avoid direct contact with the product.

### PACKAGING:

**SUPER JET** is available in the following sizes.

### CONDITIONS OF SALE & USAGE (STANDARD DISCLAIMER)

This product should not be used for any purpose or in any manner contrary to the labelling, SDS, MSDS or Information Sheet unless authorised to do so under appropriate legislation. By purchasing and using this product the purchaser assumes responsibility for any and all results that may occur and shall not hold the manufacturer liable for any loss or injury however occurring.
