INFORMATION SHEET

ACID CLEANER – AC506

Heavy Duty

PRODUCT DESCRIPTION:

AC506 is an organic acid-based product incorporating special surfactants for cleaning alloy motors and wheels, and for removing rail and heavy red dust from vessels, marine equipment, structures and vehicles. **AC506** is also suitable for cleaning bore water stains from terrazzo, concrete slipways and brick floors and walls. Does not contain Hydrofluoric acid.

USE DIRECTIONS:

AC506 may be used neat, or diluted with up to 10 parts of water. It is recommended that the product be diluted with 5 parts of water initially; this solution can be diluted further or strengthened according to the extent of the contamination. Swab surface, working from the bottom upwards and keep wet evenly until acceptably clean. Flush with fresh water. Ensure that the surface is uniformly covered as uneven application may produce streaking.

SAFETY DIRECTIONS:

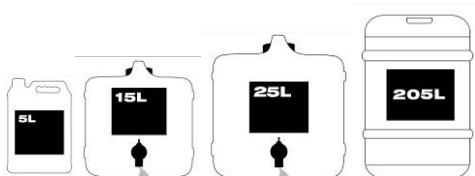

WARNING - CORROSIVE. Avoid contact with skin and eyes. Avoid breathing vapour or spray mist. Gloves and safety goggles must be worn. Refer to Material Safety Data Sheet for further information.

FIRST AID:

If poisoning occurs, contact a Doctor or Poisons Information Centre. If swallowed, DO NOT induce vomiting. Give a glass of water. If skin contact occurs, remove contaminated clothing and wash skin thoroughly. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.

PACKAGING:

5, 15, 25 and 205 litre drums

CONDITIONS OF SALE & USAGE (STANDARD DISCLAIMER)

This product should not be used for any purpose or in any manner contrary to the labelling, SDS, MSDS or Information Sheet unless authorised to do so under appropriate legislation. By purchasing and using this product the purchaser assumes responsibility for any and all results that may occur and shall not hold the manufacturer liable for any loss or injury however occurring.

BENEFITS & TIPS

- NO HYDROFLURIC ACID
- STRONG FOAMER
- HARD WATER TOLERANT
- REMOVES GREASE GRIME
- REMOVES IRON OXIDE
- REMOVES RAIL DUST
- WET & COOL SURFACES PRIOR TO APPLYING ACIDS
- APPLY FROM BOTTOM UP
