INFORMATION SHEET

AQUA GUARD INHIBITOR

CONCENTRATED ENGINE COOLANT AND RADIATOR INHIBITOR

DESCRIPTION:

AC399 Aqua Guard Inhibitor is a radiator coolant concentrate.

AC399 is formulated to conform to the recommendations of ASTM committee D15 on engine coolants.

AC399 performance closely matches the requirements of the automotive industry of Australia. The product contains propylene glycol solvent to help keep the system clean, anti corrosive, foam suppressants, and organic inhibitors.

AC399 formulation conforms to the requirements of ASTM 1384 (American Society for Testing and Materials - Corrosion Test for Engine Coolants) and accordingly extends protection to copper, solder, brass, cast iron and aluminium.

RECOMMENDED USE:

AC399 is a concentrate and has to be diluted before use in all automotive radiators using the recommended dilution provided below. AC399 is completely miscible with water and does not phase out with extreme fluctuations of temperature.

HOW TO USE:

The recommended dilution is 25mls of AC399 made up to 1 litre with deionised water (or clean soft water). Flush the radiator with clean water before putting in the coolant.

SAFETY DIRECTIONS:

AC399 is safe to use and handle. Avoid contact with eyes and skin. Wear safety goggles and gloves. Ensure the radiator is cool before adding in the coolant.

BENEFITS & TIPS

- HIGHLY CONCENTRATED GIVING GREAT ECONOMY
- INCLUDES ANTI CORROSIVE INHIBITORS
- SAFE TO HANDLE
- HELPS TO EXTENDS THE LIFE OF WATER PUMPS

PROUDLY AUSTRALIAN OWNED & MANUFACTURED BY ABLE WESTCHEM
