## INFORMATION SHEET

# AQUASOIL

## MEDIUM TERM SOIL WETTING & STABILISING COMPOUND

### INTRODUCTION

AQUASOIL was originally developed in conjunction with the Western Australian Department of Agriculture to obtain effective saturation wetting and penetration of water repellent earth and soil particles to wet and assist stabilisation of hydrophobic soils. Since the original development of AQUASOIL some 25 years ago we have now refined the product to incorporate more effective non-ionic surfactant to assist in the surface stabilisation and reduce transient and vehicle traffic generated nuisance dust particles in an environmentally responsible manner.

AQUASOIL is non bio accumulative and affords medium-term wetting of hydrophobic and super hydrophobic surface soils in many outback/mining locations through out Australia. The product is also very useful in the agriculture, pasture and horticulture industries.

### GENERAL CHARACTERISTICS

Non-toxic or non-hazardous compound.  
Liquid Concentrate.  
Assists in soil compaction.

A pH neutral compound.  
Readily high TDS water miscible.  
Environmentally responsible.

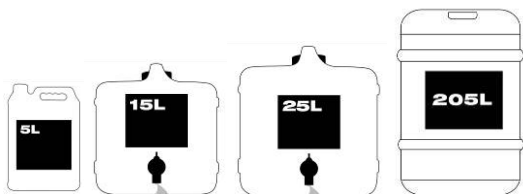

### APPLICATION CONSIDERATIONS

Water truck only required. For non surfaced haul roads, lay down and construction sites. Use 1 Litre of AQUASOIL per 500 Litres of water for initial surface treatment. Dilutions may alter depending on available water hardness and or the type of hydrophobic soils.

Chemical dosing pumps may be installed at water filling stations.

### PRODUCT PACK SIZE

5 Litre, 15 litre, 25 litre, 205 litre, & BULK deliveries.

### CONDITIONS OF SALE & USAGE (STANDARD DISCLAIMER)

This product should not be used for any purpose or in any manner contrary to the labelling, SDS, MSDS or Information Sheet unless authorised to do so under appropriate legislation. By purchasing and using this product the purchaser assumes responsibility for any and all results that may occur and shall not hold the manufacturer liable for any loss or injury however occurring.

### BENEFITS & TIPS

- RAPID SOIL PENETRATION
- LESS WATER RUNS OFF.
- LESS CAPILLARY ACTION
- ENHANCED COMPACTION.
- REDUCED WATER USEAGE.
- NO SURFACE PREPARATION.
- REDUCED MACHINERY COSTS.
- REDUCED DUST LEVELS
- HAPPY WORKERS.
